## Summary

I'm Hasan Ozudogru, a sculptor based in London with a BA in Fine Arts from the University of Hertfordshire (2023) and an MA in Sculpture from the Royal College of Art (2024). I am a friendly, team-oriented professional who thrives in collaborative environments and excels at multitasking. My strengths include hands-on experience with tools, a keen attention to detail, and quick problem-solving, all of which complement my technical expertise in sculpture and fabrication.

During my studies, I gained valuable experience through various work placements, including my role as an art technician at the University of Hertfordshire. I assisted students with their projects and supported tutors in setting up safe, successful exhibitions. Additionally, I've worked as a freelance artist specializing in metal and wood fabrication, providing technical expertise to help other artists bring their visions to life.

Since 2024, I have been working as a contractor at the Royal College of Art as an exhibition support technician. In this role, I assist students, tutors, and staff with setting up exhibitions and performances, including lighting and sound, constructing walls and display spaces, troubleshooting technical issues, and ensuring health and safety standards are maintained when handling artworks and display equipment.

Beyond my art career, I served as a Barista Manager at Costa Coffee from 2021 to 2022, where I honed my customer service, organizational, and multitasking abilities. Managing shifts, creating staff rotas, handling stock control, processing payments, maintaining machinery, and delivering excellent service in a fast-paced environment sharpened my ability to stay organized and efficient under pressure.
